

IMPROVEMENTS CONSTRUCTION UPDATE

NE MINNEAPOLIS SEWER REHABILITATION

Metropolitan Council Environmental Services (Met Council), operator of the metro-area wastewater collection and treatment system, will be repairing an aging sanitary sewer pipe in Northeast Minneapolis. Repair includes installing new maintenance holes and inserting a new pipe inside the old one using a process called cured-in-place pipe (CIPP) lining. Temporary wastewater conveyance pipes will maintain the continuous flow of wastewater around the construction site.

WHAT TO EXPECT

While we do our best to minimize impacts during construction, some temporary inconveniences may occur as the work takes place. Here is what you can expect:

- Short-term traffic disruptions.
- Parts of Tyler Street NE between 31st Avenue NE and 32nd Avenue NE and Randolph Street NE near 31st Street NE will be closed throughout construction for installation and operation of a temporary wastewater pumping station. While some street parking options will be inaccessible during construction, full alley access will be maintained.
- Noise, dust, and odors where the temporary wastewater pump system will be installed.
- Vegetation impacts due to installation of temporary wastewater pumps.
- The trail on the south side of St. Anthony Parkway will be closed between Central Avenue NE and Columbia Avenue NE to accommodate two temporary wastewater conveyance pipes. Bike and pedestrian traffic will be detoured to the St. Anthony Parkway north-side trail.
- The St. Anthony Parkway Off-Leash Dog Park will remain open, but parts will be fenced off during construction. The archery range will be closed for the duration of the project.

JOIN US AT OUR OPEN HOUSE

The project team invites you to an open house to learn more about the project.

Monday, August 3

4:30 to 6:30 p.m.

Southwest corner of St. Anthony Parkway and Tyler Street NE

Look for us under a white pop-up tent.
